MOVING FORWARD...

MISSION

WI AHEAD is an alliance of institutions and individuals committed to the principles of equal access and opportunities for all qualified students with disabilities so they may become full participants in higher education and in society at large. It is the mission of WI AHEAD to provide professional support and development to postsecondary disability service providers in Wisconsin and to other individuals and organizations who share the same commitment.

Guiding principles:

- Commitment to universal design and accessibility
- Collaboration to promote transition from secondary to post-secondary education for qualified students with disabilities

BENEFITS OF MEMBERSHIP

- Reduced conference fees, when available
- Direct notification of conferences, webinars, and training opportunities
- Facilitated opportunities to network with other state professionals in the disability services field
- Free lifetime membership for retired disability services professionals

WHO SHOULD JOIN

WI AHEAD welcomes and encourages the membership of anyone in the field of higher education and disability, including individuals helping students prepare for college or gain employment after completion of college programs. High school special education teachers, guidance staff, career counselors, and vocational counselors are encouraged to join, as are college students interested in fields related to disability services.

EXPLORE, ENGAGE, ENCOURAGE

Throughout the year, WI AHEAD hosts regional meetings and at least one statewide conference for members and other interested persons.

The purpose of these gatherings is to provide high quality, low cost, intensive, and collaborative learning opportunities. As a volunteer organization we rely on the rich and diverse experience of our members to provide the expertise necessary to move our profession forward.

Conference highlights include a keynote address by a recognized disability specialist and educational sessions focusing on everyday practices in disability services. Sessions may include assistive technology demonstrations, descriptions of unique programs implemented by schools, and information on working with students who have specific disabilities.
